Phone No: +8801795709898

Education

Bachelor of Science in Materials and Metallurgical Engineering *Feb 2020 – Mar 2025*
Bangladesh University of Engineering and Technology (BUET), Dhaka, Bangladesh
Relevant Courses: Electrical & Magnetic Properties of Materials, Phase Diagrams, Mechanical Behavior of Materials, Materials Processing for Micro & Nano-Systems, Computer Programming.
GPA: 3.18/4.00

Language Proficiency

TOEFL: 110/120 (Reading: 30, Listening: 30, Speaking: 23, Writing: 27)

Standardized Test Scores

GRE: 311 (Quantitative: 164, Verbal: 147, AWA: 3.5)

Research Interests

- Machine Learning
- Density Functional Theory
- Energy Conversion
- Molecular Dynamics
- Energy Storage Devices
- Electrochemistry

Publications

[**1**] Abdul Hamid Rumman, Kaushik Barua, **Shohaib Ibne Monju**, Mohd Rakibul Hasan Abed, Sadika Jannath Tan-Ema, Jafar F. Al-Sharab, Saquib Ahmed;
"Classification of CoCr-based magnetic thin films via GLCM texture features extracted from EFTEM images and machine learning," *AIP Advances*, vol. 14, no. 11, p. 115017, **Nov. 2024**. DOI

[**2**] Miah Abdullah Sahriar, Abdul Hamid Rumman, Ahammad Ullah, Kaushik Barua, **Shohaib Ibne Monju**, Munim Shahriar Jawad, Md. Atik Faisal, Ridwan Radit Ahsan, Houk Jang, Saquib Ahmed;
"Optical image analysis of WSe_2 thresholding for layer detection," *Computational Materials Science*, vol. 253, p. 113888, **May 2025**. DOI

Current Research Project

Accelerated Design of High-Entropy Alloys via Probabilistic Substitution and Machine Learning with DFT Simulations
Collaborators: Abdul Hamid Rumman, Kaushik Barua, **Shohaib Ibne Monju**, Aabrar Bin Salahuddin, Md. Tohidul Islam, Saquib Ahmed
– Built ML classifiers (ANN, XGBoost) using elemental descriptors to predict HEA phase stability.
– Introduced a probabilistic substitution approach generating 50k+ HEAs; DFT confirmed stability of most.
Contribution: Writing – Original Draft, Methodology, Validation, Software, Formal Analysis.
Progress: Manuscript under review at *Journal of Alloys and Compounds.*

Undergraduate Thesis

Effect of Cryogenic Deformation on Properties of AA6063 Alloys
– Investigated DCT (-196°C) and rolling effects on AA6063; observed hardness up to 102.6 HV and UTS ≈ 392 MPa due to suppressed recovery and Orowan-type strengthening.
Supervisors: Dr. A. K. M. Bazlur Rashid

Capstone Project

Synthesizing Decaffeinating Filter from Cellulose Powder to Control Caffeine in Coffee *Dec. 2022 – Sep. 2023*
– Designed and synthesized a cellulose–tea composite filter using EGDMA crosslinker prepared from ethylene glycol and acrylic acid.
– Optimized pulp composition and pressing conditions to achieve caffeine removal efficiency.
Supervisor: Dr. Ahmed Sharif

Technical Skills

- **Experimental Skills:** Uniaxial Pressing, Sand Molding, Metallography, Microstructure Analysis, Chemical Analysis, Electrodeposition, Corrosion Testing.
- **Software & Computational Skills:** VASP (DFT), OriginLab, CES Edupack, MATLAB, SolidWorks, MS Office, LaTeX.
  Molecular Dynamics: Basic simulation via LAMMPS; structure generation / visualization with VESTA, OVITO, Atomsk, Packmol.
- **Programming Languages:** C, C++, Python (matplotlib, pandas, scikit-learn).

Extra-Curricular Activities

- Vice President, BUET Career Club (2023–2024)
- Publication Secretary, SAMME (Students' Association of MME)
- Part-time Script Evaluator, Udvash Academic & Admission Care
- Instructor, ScholaraiD Academic & Admission Aid
- Volunteer, Bangladesh Flood Relief Program

Honors and Awards

- Winner, 2020 ISCEA PTAK Prize (70% scholarship for ISCEA Global Certification)
- Semifinalist, HULT Prize at BUET 2021
